Summary

Motivated and detail-oriented IT graduate with skills in PC Troubleshooting, and Networking, Web Development, and Microsoft Office Applications. Experienced in organizing data, managing tasks efficiently, and providing technical assistance. A fast learner who is dependable, adaptable, and capable of working independently in a fast-paced environment.

Education

Bachelor of Science in Information Technology

Pampanga State University | 2026

Senior High School | Information Communication Technology (ICT) Strand

San Pablo 2nd National High School | 2020-2022

Experience

Infopiphany IT Solution | San Matias Lubao, Pampanga

IT Intern | February 2026 – May 2026

- Developed and optimized automated data structures in Microsoft Excel to streamline operational tracking, reporting, and business analysis.
- Executed quality assurance (QA) testing for internal web applications, identifying functional bugs and documenting technical feedback to support the development lifecycle.
- Assisted in day-to-day technical operations, hardware troubleshooting, and administrative documentation under tight project timelines.

Project Developer | *GuaGua Ticket Trends: Violation Data Analysis System* (Capstone Project)

- **Full-Stack Development:** Engineered a robust backend using PHP and Laravel, focusing on secure data handling and efficient system workflows.
- **Database Management:** Designed and managed relational database schemas using SQL to store and retrieve complex violation data records.
- **UI/UX Design:** Implemented a modern, utility-first design approach using Tailwind CSS, ensuring a clean and accessible interface for data visualization.
- **Analytics Integration:** Developed features to track and display trends in violation data, providing actionable insights for local governance.

Certifications

CERTIFICATE OF TRAINING: COMPUTER SYSTEM SERVICING (CSS)

- Focus: PC Troubleshooting, Basic PC Operation, and Microsoft Office Applications
